Protect & Grow Your Practice

ACOM Health

ACOM Health offers a comprehensive suite of products and services for the chiropractic industry. Our solutions are designed to enhance efficiency, cut costs, increase revenues and propel practice success. ACOM Health's RAPID Software Suite delivers Clinical Documentation and Notes, and Practice Management for billing, scheduling, patient management and detailed reporting. With our Go Live, Stay Live Services, you receive a complete turnkey solution consisting of software configuration for your practice, installation, training and then ongoing support to ensure you take full advantage of your software's sophisticated and rich features.

RAPID Documentation Software

The Affordable Clinical Documentation System for Chiropractic Offices of Any Size

Our RAPID Documentation Software helps you move your claims more productively with faster SOAP notes recording, precise coding and thorough documentation. It blends into any practice quickly and easily without disrupting existing procedures or preferences. You don't change your procedures, you simply streamline them. Designed with the input of practicing doctors and their office managers, it answers urgent needs for:

- Faster, easier clinical notes
- Automated report preparation
- Compliance and coding verification
- Secure storage of patient records and reports
- Faster payment and better cash management
- Improved office productivity
- Stronger patient care focus

Touch screen support available

What Our Software Can Do For You

Our RAPID Documentation Software is designed to maximize collections and eliminate billing challenges by delivering exactly what payors need to see. Any documentation system can move you from paper to electronic records, but our solution is dramatically different because unlike competitive software products, our software guides the Doctor in producing the full and precise documentation based on the largest and most respected standard there is - Medicare. Designed with medical necessity in mind, it guides you step-by-step through a fast, efficient process that backs each claim with a rock-solid case.

RAPID Practice Management Software

An easier transition to integrated practice management

As a busy professional, your first concern is the health of your patients. But at the same time, it's important to remember that every practice is a small business as well.

Transform your practice, automatically

Turns tedious manual obligations into simple automated tasks:

- **Patients initiate intake:**
With a computer, patients can start the registration process themselves, saving front office time.
- **Guided documentation:**
Document medical necessity quickly and accurately through workflow prompts, visual aids, checklists and more.
- **Electronic filing:**
No more files and filing cabinets – Assembles everything you need including images, accident reports and other supporting information.
- **Coding, compliance and collections:**
Integrate clinical data with the ICD-9 and CPT codes you need to facilitate billing, to generate an insurance claim with just a few keystrokes.
- **Check-out, scheduling and reports:**
The program offers more than 80 management reports -- on everything from patient accounting to payroll and staff scheduling -- to help you manage your practice.

Go Live, Stay Live!

Realizing the FULL VALUE of your software investment

Most chiropractors use just 20% of their software program's features, losing 80% of their software's potential because they never completely migrate from old to new.

ACOM Health is Different. With our Go Live, Stay Live philosophy, you receive a complete solution consisting of software configuration for your practice, installation, training and then ongoing support to ensure you take full advantage of your software's sophisticated and rich features.

Your Success is Assured with ACOM Health's Proven Four Step Process

STEP 1: Configuration

Our experts will tailor the software specifically for your practice; and migrate your existing patient database into the new system.

STEP 2: Installation

For minimal distraction and maximum benefits, installation is delivered according to your schedule.

STEP 3: Training

You and your staff receive a structured lesson plan via the phone and web. Each lesson builds on the previous and includes hands on exercises to help familiarize you quickly with the software.

STEP 4: Software Assurance

In addition to software updates, unlimited phone and email support and 24x7 access to the online Customer Care Center the ACOM Health's Professional Services team will proactively track your technology progress via follow up calls and surveys to ensure you are achieving maximum productivity.

Contact us now and find out how ACOM Health's solutions can benefit you, your staff and your patients.
